COLLECTION OF SOIL SAMPLES IN THE VICINITY OF OPERABLE UNIT 2 (903 PAD, MOUND, EAST TRENCHES)

Reference: D. P. Simonson ltr (8450) to J. M. Kersh, Collection of Soil Samples in the Vicinity of Operable Unit 2 (903 Pad, Mound, East Trenches), September 5, 1990

A meeting was held on October 11, 1990, with Scott Grace of the Department of Energy (DOE) staff to discuss this project. At this meeting, it became apparent that we need to know more about the soil treatment process used by AWC Corporation before we can select soil samples for further study.

Therefore, AWC Corporation has been invited to discuss their process with EG&G Rocky Flats, Inc., and DOE technical staff on November 19, 1990. After these discussions, decisions will be made about the number of samples, appropriate sites to sample, and treatment of the samples as well as how to incorporate this study into our overall Environmental Restoration treatability study program.

J. M. Kersh, Associate General Manager  
Environmental Restoration & Waste Management
